

## SPECIALIST IN LARGE LASER CUTTING AND FOLDING

### About Folsana

**Folsana Pressed Sections Ltd** is a premier manufacturer of formed steel/alloy sections, with a reputation second to none for quality, reliability and competitiveness.

Our prestigious **130,000 square foot** manufacturing facility processes **over 700 tonnes** of steel per month and holds sufficient stock of raw materials to offer a **turnaround of 7 days**, or less if required.

Folsana has a huge inventory of heavy metal working machinery dedicated solely to sub contract work, allowing the company to accommodate (competitively) anything from prototypes to batch work.

CAD/CAM facilities (computer aided design/computer aided manufacture) allow Folsana to manufacture consistently from prototype through to batch work.

We have long-standing relationships with our clients because we maintain a strong focus on customer satisfaction and add value to their production process.

Technical excellence and superior service are the cornerstones of every Folsana job. You will see this for yourself when you choose to deal with us.

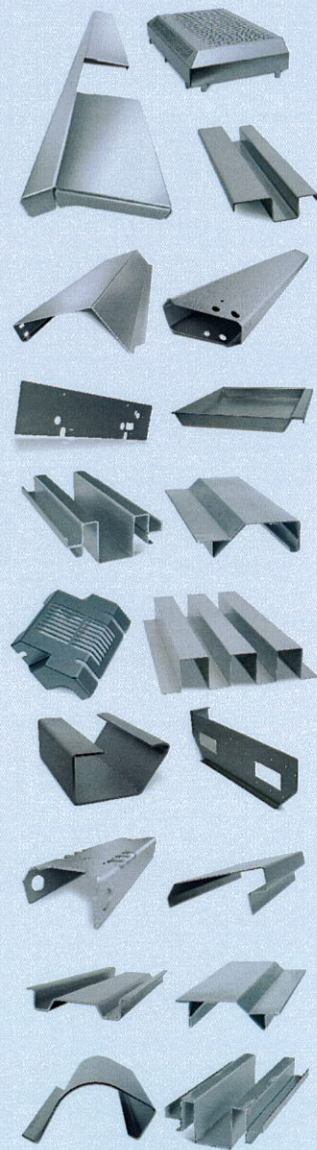

As a result, your organisation is able to free up its own labour resources and invest money in the things your business does best.

**CAPACITY LIST**

**Folsana**  
Working Steel Harder

Folded up to 10.6m long

## Folsana offers a full service in sheet metal fabrication including:

- ◆ **3D Design modelling**
- ◆ **3 off CNC Lasers**, cutting up to 8000mm x 25mm
- ◆ **14 off CNC Press Brakes**, bending up to 10600mm
- ◆ **2 off CNC Punching machines**
- ◆ **4 off Guillotines**, shearing up to 6200mm x 12mm
- ◆ **MIG Welding**
- ◆ **TIG Welding**
- ◆ **Powder Coating**
- ◆ **Highly skilled sheet metal fabricators and machine operators**
- ◆ **Modern fleet of articulated vehicles**
